

Submission Summary

Conference Name

2026 IEEE 5th World Conference on Applied Intelligence and Computing

Paper ID

3638

Paper Title

Technology-Driven Solutions for Autism support: Enhancing Intervention and Inclusion

Abstract

In this research paper, we explore technology-enabled intervention strategies for people living with ASD, specifically exploring how technology can improve intervention efficiency and facilitate social integration. Autism spectrum disorder is described as an issue associated with impairments in communication skills, difficulties with interaction with other people, and repetitive behavior patterns. In our study, we perform a comparative analysis of technologies, including artificial intelligence, mobile applications, virtual reality technology, and wearables sensors, assessing their benefits in terms of communication, social interaction, learning and cognitive processes, behavioral monitoring, and accessibility of intervention. Based on a systematic literature review of peer-reviewed studies, we identify that each of the considered technologies is suitable only for limited aspects of interventions and cannot address all requirements. Among all types of technologies, mobile applications prove to be highly accessible and supportive of effective communication, while artificial intelligence technologies have great potential for detecting autism early on. Our recommendation for future developments would involve affordable hybrid platforms combining several technologies at once.

Submission Questions Response

1. Conflict of Interest

The authors declare no conflict of interest and all authors are aware of this submission. In case of any conflict submitting author will be responsible.

Agreement accepted

2. Status of using third-party material in your article.

Third party content is defined as any material within the manuscript which is not your original work. Third party content may consist of text passages, figures, photos, screenshots, etc. and be found in many places such as but not limited to - the Internet, print and online books and articles, theses, annual reports, conference material, photocopies, course packages, translations, visually impaired readers. In particular, pay close attention to sensitive images such as identifiable persons or human research participants, recognisable architecture, logos, brands/trademarks, and images from online photo libraries. You are responsible for clearing the rights for third party content under your publishing agreement. Please confirm if your manuscript contains any third-party content?

I am not using third-party material for which formal permission is required

3. Certificate of originality

This is to certify that my submitted research paper is an outcome of my research work. I have duly acknowledged all the sources from which the ideas and extracts have been taken. The submitted paper is free from plagiarism and has not been submitted elsewhere for publication. I am aware that the publisher/conference organizer can reject it at any publication stage if it is found to be plagiarized or machine-generated.

Agreement accepted

4. Corresponding Author's Contact number

Please provide the Contact number of the Corresponding Author, including the Country code.

+91-7814955403

5. Country Name

Please provide the Name of the country where most authors belong.

India

6. Authors Contributions

Please specify individual authors' contributions in the research as recommended by the Committee on Publication Ethics (COPE).

(e.g. , study conception and design: Author_1, Author_2; data collection: Author_2; analysis and interpretation of results: Author_1, Author_2, Author_3; draft manuscript preparation: Author_2. Author_3. All authors reviewed the results and approved the final version of the manuscript.)

An author name can appear multiple times, and each author name must appear at least once. For single authors, use the following wording:

The author confirms sole responsibility for the following: study conception and design, data collection, analysis and interpretation of results, and manuscript preparation.

Study conception and design: Akriti, Nitika Bansal; literature review and data collection: Akriti, Manya; analysis and interp

7. Conference Rules and Guidelines

I am agree with Conference Rules and Guidelines given at

https://scrs.in/conference/aic2026/page/Conference_Rules_and_Guidelines

Agreement accepted
